Glassboro, NJ 08028

We are pleased
to invite you to
participate in Tech Effects™,
a new competitive technical
problem-solving program developed
by Destination ImagiNation, Inc.

In its inaugural year, this exciting new program is being offered in Kentucky, New Hampshire and Texas. Participants from elementary, middle and high school as well as those in other educational settings will have an opportunity to flex their mental muscles and display their technical prowess against their peers in a competitive arena. Tech Effects provides a unique opportunity for participants to apply scientific, engineering and mathematical skills to develop working, hands-on solutions to real-world Challenges.

Dip a French Fry into Ketchup. It's a simple Task, but the Tech Effects solution is not. The solution to this seemingly-trivial task requires technical design and the application of scientific principles. To dip your french fry into ketchup you must design and build a multi-step chain reaction contraption, a series of interconnected devices, the last of which ultimately dips the french fry into ketchup!
